

INDEX

Digest of Independent Science on Turf Pesticides and Children's Health Updated January 2020

- I. Cancer
- II. Neurological Effects
- III. Endocrine Disruption
- IV. Asthma
- V. Reports

I. CANCER

1. "Pesticide Exposure as Risk Factor for Non-Hodgkin Lymphoma Including Histopathological Subgroup Analysis." Eriksson, M., Hardell, L., Carlberg, M. and Akerman, M. *International Journal of Cancer*. 123, 1657-1663 (2008). <https://www.ncbi.nlm.nih.gov/pubmed/18623080>
2. "Childhood Brain Tumors, Residential Insecticide Exposure, and Pesticide Metabolism Genes." Neilsen, S., et al. *Environmental Health Perspectives* 118(1):144-149 (2010). <https://www.ncbi.nlm.nih.gov/pubmed/20056567>
3. "Residential Pesticides and Childhood Leukemia: A Systematic Review and Meta-Analysis." Turner, MC., Wigle, DT., and Krewski, D. *Environmental Health Perspectives* 118(1):33-41 (2010). <https://www.ncbi.nlm.nih.gov/pubmed/20056585>
4. "Pesticides and Cancer: Insights into Toxicoproteomic-Based Findings." George, J. and Shukla, Y. *Journal of Proteomics* 74: 2713-2722 (2011). <https://www.ncbi.nlm.nih.gov/pubmed/21989265>
5. "Characterization of Residential Pesticide Use and Chemical Formulations through Self-Report and Household Inventory: The Northern California Childhood Leukemia Study." Guhla, N., et al. *Environmental Health Perspectives* 121(2):276-282 (2013). <https://www.ncbi.nlm.nih.gov/pubmed/23110983>
6. "Residential Exposures to Pesticides and Childhood Leukemia." Metayer, C. and Buffler, P. *Radiation Protection Dosimetry* 132(2):212-219 (2008). <https://academic.oup.com/rpd/article-abstract/132/2/212/1610870>
7. "Household Exposure to Pesticides and Risk of Childhood Acute Leukemia." Menegaux, F., et al. *Occupational and Environmental Medicine* 63:131-134 (2006). <https://www.ncbi.nlm.nih.gov/pubmed/16421392>
8. "Association Between Chronic Exposure to Pesticides and Recorded Cases of Human Malignancy in Gaza Governorates (1990-1999)." Safi, JM. *The Science of the Total Environment* 284:75-84 (2002). <https://www.ncbi.nlm.nih.gov/pubmed/11846176>

9. “A Case-Control Study of Childhood Brain Tumors and Fathers’ Hobbies – A Children’s Oncology Group Study.” Rosso, AL., et al. *National Institutes of Health, Cancer Causes Control* 19(10):1201-1207 (2008). <https://www.ncbi.nlm.nih.gov/pubmed/18560982>
10. “Reported Residential Pesticide Use and Breast Cancer Risk on Long Island, New York.” Tietelbaum, SL., et al. *American Journal of Epidemiology* 165(6):643-651 (2007). <https://www.ncbi.nlm.nih.gov/pubmed/17166928>
11. “Parental Occupational Exposure to Pesticides and Childhood Brain Cancer.” Van Wijngaarden, E., et al. *American Journal of Epidemiology* 157(11):989-997 (2003). <https://www.ncbi.nlm.nih.gov/pubmed/12777362>
12. “In Utero Pesticide Exposure and Leukemia in Brazilian Children <2 Years of Age.” Ferreira, JD., Couto, AC., Pombo-de-Oliveira, MS., and Koifman, S. *Environmental Health Perspectives* 121(2):269-75 (2013). <https://www.ncbi.nlm.nih.gov/pubmed/23092909>

II. NEUROLOGICAL EFFECTS

1. “Behavioural disorders in 6-year-old children and pyrethroid insecticide exposure: the PELAGIE mother–child cohort.” Viel, J. F., et al. *Occupational and environmental medicine* 74(4), 275-281 (2017). <https://oem.bmj.com/content/74/4/275.long>
2. “Association of pyrethroid pesticide exposure with attention-deficit/hyperactivity disorder in a nationally representative sample of US children.” Wagner-Schuman, Melissa, et al. *Environmental Health* 14: 1- 44 (2015). <https://link.springer.com/article/10.1186/s12940-015-0030-y>
3. Pesticide exposure and child neurodevelopment: summary and implications. Liu, J., & Schelar, E. *Workplace Health & Safety* 60(5), 235-242 (2012). <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4247335/>
4. “Pesticide Toxicity and the Developing Brain.” Eskenazi, B., et al. *Basic & Clinical Pharmacology & Toxicology*, 102, 228-236 (2008). <https://www.ncbi.nlm.nih.gov/pubmed/18226078>
5. “Neurobehavioral and Neurodevelopmental Effects of Pesticide Exposures.” London, L. et al. *NeuroToxicology* 33 887-896 (2012). <https://www.ncbi.nlm.nih.gov/pubmed/22269431>
6. “Exposures of Children to Organophosphate Pesticides and Their Potential Adverse Health Effects.” Eskenazi, Bradman and Castorina. *Environmental Health Perspectives* 107(supl 3):409-419 (1999). <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC1566222/>

7. “Prenatal and Childhood Exposure to Pesticides and Neurobehavioral Development: Review of Epidemiological Studies.” Jurewicz, J. and Hanke, W. *International Journal of Occupational Medicine and Environmental Health* 21(2): 121-132 (2008).
<https://www.ncbi.nlm.nih.gov/pubmed/18614459>
8. “Brain Anomalies in Children Exposed Prenatally to a Common Organophosphate Pesticide.” Rauh, V., et al. *Proceedings of the National Academy of Sciences*. (2012).
<http://www.pnas.org/content/109/20/7871>
9. “Prenatal Exposure to Organophosphates, Paraoxonase 1, and Cognitive Development in Childhood.” Engel, SM., et al. *Environmental Health Perspectives* 119(8):1182-1188 (2011). <https://www.ncbi.nlm.nih.gov/pubmed/21507778>
10. “Fetal Exposure to Propoxur and Abnormal Child Neurodevelopment at 2 Years of Age.” Ostrea, EM., et al. *NeuroToxicology* 33 669-675 (2012).
<https://www.ncbi.nlm.nih.gov/pubmed/22155319>
11. “Neurodevelopmental and Neurobehavioral Effects of Organophosphate Pesticides Exposure in Newborns and Children.” Florian, C., et al. *Environmental Security Assessment and Management of Obsolete Pesticides in Southeast Europe*. Springer Netherlands, 2013. 139-145. https://link.springer.com/chapter/10.1007%2F978-94-007-6461-3_12
12. “Review of Current Evidence on the Impact of Pesticides, Polychlorinated Biphenyls and Selected Metals on Attention Deficit/Hyperactivity Disorder in Children.” Polanska, K., Jurewicz, J. and Hanke, W. *International Journal of Occupation Medicine and Environmental Health* 26(1):16-38 (2013).
<https://www.ncbi.nlm.nih.gov/pubmed/23526196>
13. “Parental Occupational Exposure to Pesticides as Risk Factor for Brain Tumors in Children and Young Adults: A Systematic Review and Meta-analysis.” Van Maele-Fabry, G., Hoet, P. and Lison, D. *Environment International* 56:19-31 (2013).
<https://www.ncbi.nlm.nih.gov/pubmed/23567326>

III. ENDOCRINE DISRUPTION

1. “Effect of endocrine disruptor pesticides: a review.” Mnif, W., Hassine, A. I. H., Bouaziz, A., Bartegi, A., Thomas, O., & Roig, B. *International journal of environmental research and public health* 8(6), 2265-2303 (2011).
<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3138025/>
2. “Pesticides and Children.” Vincent, G. *Toxicology and Applied Pharmacology* 198:153-163 (2004). <https://www.sciencedirect.com/science/article/pii/S0041008X04000493>

3. “Toxic Effects of Pesticide Mixtures at a Molecular Level: Their Relevance to Human Health.” Hernandez, AF., et al. *Toxicology: Article In Press* (2012). <https://www.ncbi.nlm.nih.gov/pubmed/22728724>
4. “Persistent Developmental Toxicity in Rat Offspring After Low Dose Exposure to a Mixture of Endocrine Disrupting Pesticides.” Jacobsen, PR., et al. *Reproductive Toxicology* 34:237-250 (2012). <https://www.ncbi.nlm.nih.gov/pubmed/22677472>
5. “Neurodevelopment and Endocrine Disruption.” Colborn, T. *Environmental Health Perspectives* 112(9):944-949 (2004). <https://www.ncbi.nlm.nih.gov/pubmed/15198913>
6. “Endocrine Disrupting Pesticides: Implication for Risk Assessment.” McKinlay, R., Plant, JA., Bell, JNB., and Voulvoulis, N. *Environmental International* 34:168-183 (2007). <https://www.sciencedirect.com/science/article/pii/S0160412007001444>
7. “Currently Used Pesticides and Their Mixtures Affect the Function of Sex Hormone Receptors and Aromatase Enzyme Activity.” Kjeldsen, LS., Ghisari, M. and Bonefeld-Jørgensen, EC. *Toxicology and Applied Pharmacology* (2013). <https://www.ncbi.nlm.nih.gov/pubmed/23871939>
8. “Effect of Nonpersistent Pesticides on Estrogen Receptor, Androgen Receptor, and Aryl Hydrocarbon Receptor.” Medjakovic, S., et al. *Environmental Toxicology* (2013). <https://www.ncbi.nlm.nih.gov/pubmed/23436777>

IV. ASTHMA

1. “Respiratory Symptoms in Children and Exposure to Pesticides.” Salameh, PR., et al. *European Respiratory Journal* 22:507-512 (2003). <https://www.ncbi.nlm.nih.gov/pubmed/14516143>
2. “Gene-Environmental Interactions and Airway Disease in Children.” Schwartz, DA. *Pediatrics, Official Journal of the American Academy of Pediatrics* 123:S151-S155 (2009). <https://www.ncbi.nlm.nih.gov/pubmed/19221158>
3. “Identifying and Managing Adverse Environmental Health Effects: Pesticides.” Sanbron, M., Cole, D., Abelsohn, A. and Weir, E. *Canadian Medical Association Journal* 166(11):1431-1436 (2002). <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC111218/>
4. “Pesticides and Asthma.” Hernandez, AF., Parron, T. and Alarcon, R. *Current Opinion in Allergy and Clinical Immunology* 11(2):90-96 (2011). <https://www.ncbi.nlm.nih.gov/pubmed/21368619>

V. REPORTS

1. “Commonly Used Pesticides – Human Health & Environment Impacts.” Updated and Adapted by the Healthy Communities Project, Wisconsin and produced with a grant from the U.S. Environmental Protection Agency, 2006.
2. “Pesticide Exposure in Children.” Policy Statement, Official Journal of the American Academy of Pediatrics. November 26, 2012.
<http://pediatrics.aappublications.org/content/130/6/e1757.full>
3. “America’s Children and the Environment, Third Edition.” United States Environmental Protection Agency. January 2013. <https://www.epa.gov/ace>
4. “President’s Cancer Panel 2008-2009 Annual Report: Reducing Environmental Cancer Risk.” Suzanne H. Reuben. U.S. Department of Health and Human Services, National Institutes of Health, National Cancer Institute. April 2010.
https://deainfo.nci.nih.gov/advisory/pcp/annualReports/pcp08-09rpt/PCP_Report_08-09_508.pdf
5. “Risks From Lawn-Care Pesticides: Including Inadequate Packaging and Labeling.” Environment and Human Health. 2003. http://www.ehhi.org/lawnpest_full.pdf
6. “Asthma, Children and Pesticides. What you should know to protect your family.” Beyond Pesticides 2005. <https://beyondpesticides.org/programs/children-and-schools/hazards-of-pesticides>
7. “Pesticides and Human Chronic Diseases: Evidences, Mechanisms and Perspectives.” Mostafalou, S. and Abdollahi, M. Toxicology and Applied Pharmacology 268(2):157-177 (2013) <https://www.ncbi.nlm.nih.gov/pubmed/23402800>
